PROJECTS

Title: Crop Monitoring and Wildlife Alert System using IOT

Description: The project aims to enhance farming efficiency by automating crop hydration and wildlife detection. It provides real-time soil moisture, temperature, and humidity data, and alerts for wildlife presence. Integration with ThingSpeak enables remote monitoring and data analysis for actionable insights.

Title: Automatic plant irrigation system using 555IC timer.

Description: The purpose of this project is to water the plants automatically if we forget to water them or we are away from home. We all know that plants need some extra attention and care, they get spoiled or die if they don't get water frequently.

Title - Third eye for blind.

Description - The Third Eye for Blinds is an innovation that helps blind people to navigate with speed and confidence by detecting nearby obstacles using the help of ultrasonic waves and notifying them with a buzzer sound or vibration.
